THIRD PSSI CYBER SECURITY ACADEMY
Dates: **October 5—9, 2020**

The Third **PSSI Cyber Security Academy** (CSA) is a one-week course from one of the leading think tanks in Central and Eastern Europe on national, regional and transatlantic security issues. It consists of 15 lectures, workshops and practical training, and is designed for a group of 20–30 university students and young professionals.

The course offers a unique opportunity to meet current and future Czech leaders in this dynamic field.

The CSA will provide an overview of the most important geopolitical, policy, legal, and institutional aspects of cyber security. The basis of the interdisciplinary course will be an analysis of the situation in the Czech Republic, supplemented by the perspectives of select foreign partners and representatives from the governmental sector, private and academic sectors. The concept and structure of the course provides participants with a unique view of cyber security not offered elsewhere.

The main partner of this year's CSA is the National Office for Cyber and Information Security (NÚKIB) and is supported by the American Embassy in Prague. The last two courses were also supported by the top consulting firms (e.g. KPMG), technology companies (e.g. ERA-BHC) and foreign Embassies (e.g. Estonia, Great Britain, USA, etc.).

Applications including your CV (in .pdf format) and a short essay (in .pdf format) with a title "What was the most important cyber security–related event in the last six months and why?" send to faltys@pssi.cz **by August 31, 2020**.
